

CALL FOR APPLICATIONS

The Hungarian University of Agriculture and Life Sciences Institute Student Research Conference Participation Autumn Semester 2023/24

The Institutes of the Hungarian University of Agriculture and Life Sciences (MATE) are announcing the Student Research Conference (TDK) for the autumn semester of 2023/24.

The Conference invites applications from MATE BSc and MSc students and high school students who engage in scientific activities that fit the institution's profile, pursue it for self-education purposes, and prepare it as a quality student work, which will be presented at the Student Research Conference.

Eligible participants: MATE full-time or part-time undergraduate, graduate, or undivided study program students receiving state scholarship or self-funded financing with an active student status at any MATE campus or training location or high school students studying at a secondary educational institution guided by MATE tutors/researchers.

Important deadlines:

Application start date: September 18, 2023

Application deadline: October 4, 2023, 24:00 (CET)

Submission of summary and paper: October 25, 2023, 24:00 (CET)

Date of the Student Research Conference: November 22, 2023

Conference sections are created based on the papers that have been nominated. A minimum of 6 received papers is required to form a section. In case there are less than 6 papers on a particular topic, a multidisciplinary section may be established. If the required number of submissions for an English-language section is not met, the English-language submissions will be placed into the relevant Hungarian-language TDK sections based on their respective topics.

A university campus with an insufficient number of applicants will not organize an autumn Student Research Conference. Nevertheless, students studying at that campus will be welcome to attend conferences at other campuses if needed.

The paper is evaluated by two experts in the field. If there is a significant difference of opinion in the evaluation of the student work (20% or more difference in the scores), the organizing institution's Student Research Conference Committee may request a third reviewer or refer the decision to the section committee's chairman's competency. The presentation of the paper at the Conference is 15 minutes, followed by a 10-minute discussion.

The Conference sections are organized jointly by the Campus Institute of Student Research Conference Presidents and the Institute of Student Research Conference Presidents.

For detailed information on the Conference, application form, and submission platform, as well as the summary (resume) and formal requirements of the papers can be found the link below.
