we invite you to see
66 projects from 25 countries
featured in traveling exhibition:

Reconnecting Landscape

IFLA Europe Exhibition of Landscape Architecture
Projects in Europe 2026

We are living in times of landscape architecture. Across Europe, we are confronted by a polycrisis of climate instability, biodiversity decline, water scarcity, soil degradation, pollution, mobility challenges, and threats to both physical and mental wellbeing. Yet people and planet do not experience these crises separately. They experience them together through landscape. The crises are interconnected, and so must be the solutions. These challenges increasingly require landscape thinking. We must use this momentum - a moment when many of society's most pressing challenges call for landscape-led solutions that reconnect systems, restore continuity, and create resilient futures. Landscape architecture works through systems and connections. It reconnects people with nature, water with land, ecology with culture, and visions with action. It creates spaces for inspiration, spaces for learning, spaces for encounter, it creates new spatial experiences and supports new ways of living together.

It is my great pleasure to introduce the third edition of the IFLA Europe Exhibition, Reconnecting Landscape. The projects presented in Reconnecting Landscape demonstrate the breadth and creativity of landscape architecture across Europe. Together, they reveal landscape as a choreography of life - connecting movement and place, seasons and time, water and land, biodiversity and culture, while creating ambiances, emotions, and everyday experiences that nurture culture, identity, belonging, and quality of life. This exhibition also reminds us of our responsibility. We are privileged to work with the landscapes by changing reality, shaping daily life and collective memory. We inherit the achievements of previous generations, learn from their mistakes, and reinterpret them for contemporary challenges to reimagine futures. I would like to thank all participating National Associations, project teams, and organisers who made this exhibition possible. Together, they demonstrate that reconnecting landscape is not only a theme for this exhibition, but an essential task for the future of Europe.

Indra Purs
IFLA Europe President

Contemporary reality brings new challenges. Technological innovation, artificial intelligence, and digital media are transforming how we live, often dividing our attention between physical and digital worlds. Yet it is the real landscape that remains our place of rest, regeneration, and belonging. More than a setting, it records natural and cultural processes, preserves identity and tradition, and strengthens social awareness. Its quality directly shapes the quality of our lives.

Landscape architecture, through its holistic approach, has a unique ability to reconnect what has become fragmented across ecological, cultural, and social dimensions. It enables regeneration, adaptive reuse, and the transformation of places to meet changing needs, with landscape itself serving as the framework that integrates diverse spatial, environmental, and community values.

The public space projects presented in this exhibition demonstrate that this vision is already being realized. Developed by multidisciplinary teams, they showcase best practices in creating beautiful, sustainable, and inclusive places. Together, they prove that investing in everyday public spaces improves quality of life while creatively restoring, reclaiming, and reconnecting people with their environment.

Urszula Forczek-Brataniec
Exhibition Working Group Chair
SAK Poland/CUT

The world around us is changing, and fast. We have to run faster than ever to stay on top of things. That it is necessary to adapt to climate change and, where possible, to fight against it, becomes more obvious with every year. At the same time, there is a growing tendency to suppress and ignore this reality. To counter this, it is important to renew our connection with nature, both physically and mentally. The cooling effect of green spaces, particularly trees, in urban environments is well known. As heat stress rises, this effect becomes increasingly valuable. At the same time, rising temperatures are impairing the growing conditions for many plants, especially in small, isolated locations. Creating connections between green spaces and so creating bigger microclimates, is therefore important. People and nature can wander along green corridors and so connect with each other. Often, quite small measures which connect two sites, fill gaps, can produce an important effect. With the growing awareness of the global decline in biodiversity, links and connections appear as central arcs of numerous discourses.

By bringing this exhibition into the public, we hope to show how connections have been built with nature, cultural heritage and the local communities. We hope that what you are about to experience, exploring the projects, will arouse your curiosity, stimulate thought, and inspire you to push the boundaries of design to facilitate reconnecting with the landscape.

NÁVRH

KONCEPT

Navracíme terasám původní geometrii, kterou doplňujeme o novou horní terasu – vyhlídku na zámek s vazbou na průchod Zlaté stezky městem. Prostory teras navracíme do uzavřených zahrad za zdí s příkloněním k obyvatelnosti tohoto veřejného prostoru / společného místa. Atmosféry a funkce teras jsou komponovány v rytmu aktivních a relaxačních ploch. Navrhujeme maximální možnou přístupnost teras po rampách (kočárky, kola, vozíky). Terasy se stávají světebným hodnotným prostorem ve středu města, který má potenciál k užívání obyvateli města Vimperk všech věkových kategorií. Rekonstrukci teras vnímáme jako impuls k proměně celého území a k funkční interakci okolních budov pivovaru a dalších městských objektů (zejména č.p. 81).

TERASY

Terasy se stávají městským veřejným prostorem. Prostupnost je navržena ve dvou schématech. První po rampách, kdy je první terasa přístupná bezbariérově z náměstí novou lávkou přes Křesanovský potok. Druhé schéma vychází z historických stop, jsou to krátká přímá propojení mezi terasami. Velkým potenciálem je aktivace teras z přílehlých objektů (a naopak). Čelní hrany teras jsou volné a přístupné výhledům. Umístění veřejných toalet je v rámci dopracování studie situováno do sklepních prostorů městského domu - objektu č.p. 81 s přístupem přímo z ulice Pivovarské.

KRAJINA TERAS A JEJICH FUNKCE

Nová funkce a užívání teras přirozeně generuje i intenzitu navrhované vegetace. Volnou mlatovou plochu první terasy doplňujeme o dva solitéry listnatých stromů, na druhé terase odkazujeme na historii a navracíme podobu ovocného sadu s krajovými odrůdami a loukou, v zadní části s otevřeným prostorem s vodním prvkem a bylinkovým záhonem. Třetí terasa se svou atmosférou blíží Trnkové zahradě za zdí - trochu tajemnou, divokou s bohatým podrostem stínomilných trvalek. Ze stávajících hodnotných stromů ponecháváme starou třešň a vzrostlý dub s javorem vyrůstající ze spodní části opěrné zdi. Terasy nabízí využití, od komorních i větších koncertů, výstav, přednášek, sympozií, letního kina, venkovní výuky studentů, pořádání trhů, až po více odpočinkové a klidové funkce na horních terasách.

Legenda

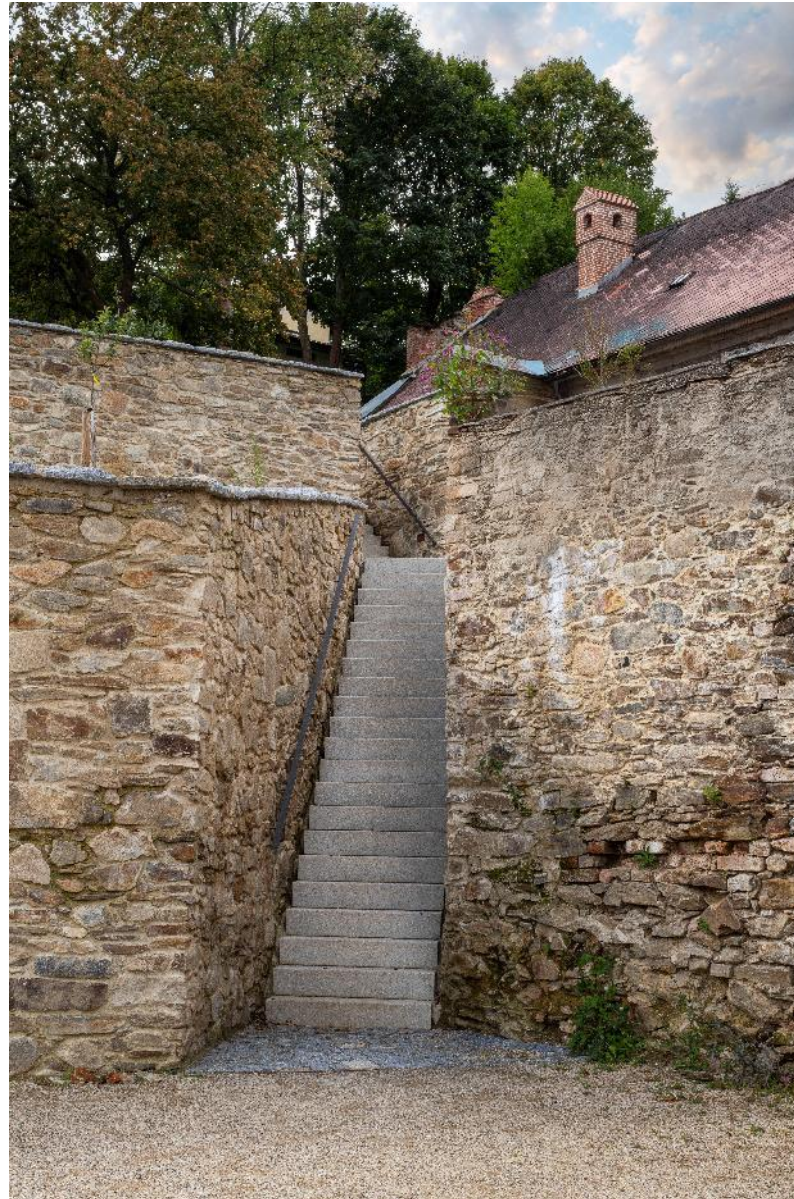

----	hranice řešeného území		prorostlá štětová dlažba		pěšina

BOSK ROUTE

Van 7 mei tot en met 14 augustus 2022 wandelt Bosk met meer dan 1000 bomen door de binnenstad van Leeuwarden. In deze periode worden op doordeweekse dagen 150 boombakken per dag verplaatst. Dit betekent dat het bos op de ene locatie afneemt en op de andere locatie groeit. Deze verplaatsmomenten zijn in onderstaande data meegenomen. De data zijn onder voorbehoud. Kijk voor meer informatie op arcadia.frl.

- 01 Stationsplein
2 mei - 15 mei
- 02 Lange Marktstraat - Sophialaan
9 mei - 20 mei
- 03 Beursplein - Wirdumerpoortsdwinger
- Nieuweweg
16 mei - 27 mei
- 04 Blakhuysplein - Druifstreek
- Tweebaksmarkt - Turfmarkt
23 mei - 10 juni
- 05 Tulen - Amelandsplein - Voorstreek
- Amelandshof - Bonifatiusplein
6 juni - 17 juni
- 06 Nieuweburen - Jacobijnerkerkhof
13 juni - 24 juni
- 07 Gouverneursplein
- Raadhuisplein - Hofplein
20 juni - 8 juli
- 08 Waagplein
4 juli - 15 juli
- 09 Wilhelminaplein
11 juli - 29 juli
- 10 Ruiterskwartier - Mata Hariplein
- Groot Schavernek - Nieuwestad
25 juli - 5 augustus
- 11 Oldehoofsterkerkhof
1 augustus - 19 augustus
