Books:

How to be a successful book author

Compendium:

Raising your profile as a species or subject expert with a Compendium datasheet

Q&A

This is a free webinar. The webinar will be recorded and available on demand.

Speakers

Erika Newton | Journals Publisher

I joined CABI as Publisher for journals in 2022. My role is to oversee and develop the journals portfolio along with the preprint server, agriRxiv. I initially trained as a research scientist and completed a PhD in the field of ecology before moving into learned society and not-for-profit publishing in 2010.

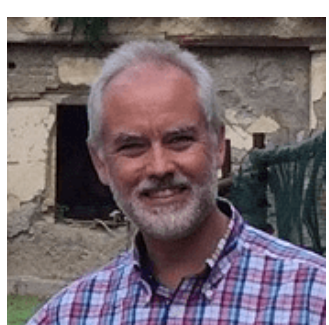

Rachael Russell | Cases Publisher

I joined CABI in 2015 as a Commissioning Editor for Horticulture and Plant Sciences, having previously held editorial roles at academic publishers. In 2021 I moved into CABI's Digital Learning team and then on to Product Development. As Product Development Manager I oversee the growth and improvement of our Cases publishing programme.

Claire Parfitt | Books Publisher

I joined CABI in 2001 and since this time have expanded my knowledge of book publishing. I am now head of the Books Editorial Team at CABI. I also commission content in the areas of tourism, hospitality and leisure.

Gareth Richards | Compendium Programme Manager

I manage the team that develops, maintains and updates the CABI Compendium. This knowledgebase collates information on environmental and agricultural, production, health and biosecurity. Through intelligent data management, linkage and user interfaces the CABI Compendium offers knowledge, problem solving and decision-support. I've worked at CABI since 1996, starting in the CAB Abstracts Animal Health Team as a parasitology specialist, and joined the Compendium Team in 2000.
